

## SUBJ: GPE CONCEPT OF THE ALL-SEEING EYE OR DIVINE EYE

12/06/2021

Hi,

We have practiced and applied God-Presence Energy (GPE) together since 04/2020 in the midst of a pandemic. I have explained the concept of God's Presence in the past. My primary objective is to give you a better understanding so you are constantly focused and motivated. Gradually many of you recognized the impact of the invisible GPE because of your humility, openness and truthfulness.

In 02/2021, we were fortunate to organize the GPE Meditation Class at SSM St. Clare Hospital and continue to conduct the training course on a monthly basis. Some SSM employees, who attended this training course, got the meaning of GPE because the SSM Mission is: "*Through our exceptional health care services, we reveal the healing presence of God.*" All SSM employees are constantly reminded of this point during the daily activities or performance reviews. Since the thought of God's Presence is always connected to the work routines, this vibration is fairly active because of the employees' combined focus level throughout the entire SSM Health Care Ministry. For that reason, anybody who is either trained or tuned in to the vibration of God's Presence will be able to detect its signal (or energy pattern). SSM Health's foundation is based on the Christian teachings, so its employees should know that the founder is the Lord Jesus Christ. Depending on how each person is connected to the Lord Jesus Christ, he would communicate or reveal himself in order to guide this individual. When somebody is in a communication link with the Lord, the GPE vibration is strong. People may notice how effective he/she is with his/her thoughts, words or actions.

For the GPE practitioners who successfully had the Opening of Intuitive Potential, we trained ourselves to tune-in and detect the GPE's subtle pattern or signal or vibration. Some of you may ask, "What is the purpose of detecting the GPE signal?" I can tell you this energy signal is not easily detected by anybody because it involves a bi-directional connection. I am referring to the connections between human beings and God's Presence. For example, somebody may want to detect or feel the GPE vibration, but God (or the Source) decides that he/she is not ready and nothing happens. On the other hand, another person does not look for it or does not expect to feel anything, but he/she suddenly feels a strong GPE vibration during a certain event. It catches this person's attention and eventually allows him/her to tune in or find God's Presence.

I told you many times that I often joked with my SSM coworkers or GPE colleagues by saying, "*Do not under-estimate the power of the Force!*" Right now, the word "GPE" does not mean much, or has no values to many people. It will soon be recognized by all people. You will be one of the witnesses who actually experienced and observed the birth and growth of GPE. Yes, it may sound far-fetched or impossible or ridiculous to many people, but I know the Lord does not put a vision in my mind for no reason.

More than a week ago, during my daily meditation I saw the image of the All-Seeing Eye or Divine Eye. This vision came with a download of profound concept that took me a while to capture everything down on my journal.

### **God's All-Seeing Eye or Divine Eye:**

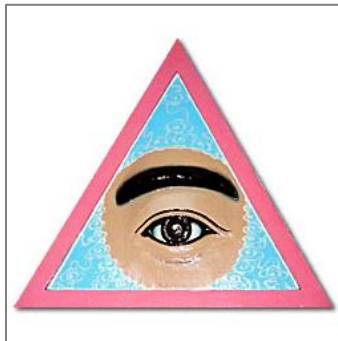

During the GPE training courses I often explained that God's Presence exists in the smallest and indivisible particle which is the basic unit of matter, and God's Presence also exists in the largest unit of creation which is the entire universe. Using the example of nanotechnology, we can think of God's Divine Eye as a microscopic webcam that is smaller than an atom. Furthermore, we can visualize God's Presence as a macroscopic lens that covers the whole universe.

For all GPE practitioners, this question came up in my meditation. I present it here so you can reflect on: ***What is the connection between the Opening of Intuitive Potential and the Divine Eye?*** The answer(s) will inspire or strengthen or surprise you. At least, they really inspired, strengthened and surprised me.

Most of us have seen the Eye of Providence or All-Seeing Eye on the back of the U.S. dollar bill.

In Vietnam, we have Cao daism or Cao Đài religion that worships the Divine Eye.

Cao Đài's Holy See is in Tây Ninh. I was fortunate to be inside the temple in 1991.

When these thoughts came to me during my meditation, I had the image of the Divine Eyes that were very small, and I saw many of them everywhere around me. I also saw a gigantic Divine Eye that looks over the entire universe and nothing can escape it. I continued to reflect on these visions and captured these concepts here for my future reference. Being the One who manages all living creatures, God can use the microscopic webcams to see inside each body or mind. God also has the macroscopic lens to look at the big picture and monitor how everything fits together. As God's children, we always have the feeling that our parent is watching and for this reason we use the symbol of the All-Seeing Eye or Divine Eye to remind ourselves of God's omnipresence, omniscience and omnipotence. The idea of the microscopic webcam is quite clever because it gives me a good explanation on how God can see the inner secrets or what we hide in the dark. As long as we have "*không gian*" or empty space, these microscopic webcams are present even in the vacuum environment. God has the ability of switching between the microscopic video feeds and the macroscopic picture.

Microscopic sensors: Here is another concept for us to consider. I use the example of sensors to illustrate this point. We have seen modern cars equipped with many sensors that allow the vehicle to drive or park itself. I imagine being in a room filled with millions of microscopic Divine Eyes (or sensors) that actively observe everything and constantly make adjustments to maintain a harmonious atmosphere of the entire room. I recognize how these microscopic sensors manage the air flow, movements, temperatures, as well as interactions that involve everything inside this room. These microscopic sensors guide the mosquitoes to fly safely, or keep the temperature within a bearable range, or control the toddler's steps to help him walk, and so on.

As human beings, we look at the world around us with our physical eyes and do not see the complex management system under God's Presence. We take things for granted and often ignore what nature has provided. With human abilities and intelligence, we think we have everything under control. But in fact, we are out of control because we are destroying our own world and ourselves with Selfishness and Power Struggle. Although it seems that the situations are chaotic or disastrous, I see the microscopic eyes will make the necessary adjustments to make sure everything goes according to the Divine Plan.

With the Opening of the Intuitive Potential, you can focus to look deeper and allow your visual sensor to connect to the network of microscopic Divine Eyes. I guarantee that you will see a completely different view, and it will help you make better decisions or act in agreement with the collective growth.

Using this microscopic perspective, we can imagine how each person may have a day of *Favorable Circumstances (Thuận Duyên)* or *Adverse Situations (Nghịch Duyên)*. It depends on the way we act or live. If we operate in agreement with the collective growth and evolution of all living creatures, then we are moving with the flow and there are no conflicts or problems that require the adjustments from these microscopic Divine Eyes (or sensors). Let us consider a modern car with the sensors that are designed to help the driver be alert and to prevent from accidents. For example, if the car is veering off and be dangerously close to another vehicle, the sensor would warn the driver, or when a driver is distracted as he backs out the driveway, the sensors detect a pedestrian walking toward the car and give a warning or immediately stop the car. These sensors are design to ensure the safety of the driver or passenger(s) inside the car as well as the other cars and pedestrians outside. In the same manner, the microscopic and macroscopic Divine Eyes constantly monitor every motion and action to ensure the harmonious growth and evolution of all living creatures.

In this microscopic view, we may see how these tiny sensors can control the air flow to prevent a piece of dust from entering a person's nostril that would make him sneeze at the exact moment when he is about to pour coffee from a freshly brewed pot to his CEO's cup at the Board Meeting. It would be a total disaster if he sneezes and pours hot coffee on his CEO. Since he is a kind and hard worker who only tries to help, these microscopic Divine Eyes help him with a peaceful situation.

I save all of these thoughts here for my future reference. Hopefully they are useful to you, too.

Thank you,  
Vu Tran
