THE IMPOPTANT VALUES OF HUMILITY & PATIENCE

31 August 2020

Dear Lord,

I have been meditating on many thoughts that I have received from You lately. I decided to express my gratitude in this letter, and to remind everyone of the way You teach us the values of Humility and Patience. You have opened my heart/mind and planted the seed of God's Presence inside. This seed of God's Presence is alive and growing within my heart/mind. Gradually, I have realized that it dominates my thinking process and fills my mind with many thoughts or visions.

For more than a week I have received many explanations or ideas, and they were about the God-Presence seed or GP seed. Particularly, You gave me a deeper understanding of the important values of thumility and Patience in the development of the GP seed. There are many pieces of information that appeared in my mind. I try my best to present them here in a chronological order for two reasons. My first intention is to thank You for the knowledge and support You have given me over the years. My second purpose is to write down what I have perceived so You can evaluate and guide me by providing indirect feedback from people who read this.

BECOMING THE GP SEED

Two nights ago I had a dream in which I was a fing seed that was buried very deep under the earth. Even though I was a fing seed, I still had the consciousness and sensory systems. I felt the pressure and the weight of the earth because I was buried very deep. I recognized the presence of insects or worms around me, but I could not move. Suddenly I realized that as a seed I have the potential to grow in this environment. I might not be able to move but I could grow even with the insects, worms or weeds around me. Then, I was transported back to the current state of being and observed a seed

that You planted deep inside my head. This seed is an idea or thought and it is buried with my subconscious mind. The insects, worms or weeds are in the forms of doubt, fear, ignorance, power, selfishness or temptation. You have shown me a very profound point in which You reminded me of the GP seed. This GP seed contains the full capacity of God's creative power and in finite wisdom. The GP seed can be a brilliant idea or profound thought that is sown in the mind. The seed may gnow when I take it seriously and work diligently to transform a neuron firing to a verbal statement. This is the first stage in which I am convinced that it will come true, and I am determined to make it happen. You have taught me that each person does not have to see the encouraging signs or positive results to know the capacities of this seed, because as helshe reaches the GPE level of 90% or higher, helshe becomes the GP seed.

It is very important to realize that You opened the heart/mind and planted the GP seed so each person can learn to be still and letit grow. As humans we have the constant worries, imaginary fears, or incessant thoughts that overwork the brain and deplete the body's energy. We need to "park" our mind and be still. You have shown me a vision of a loving parent who really wants to say or show something to the children who are toddlers and teenagers. Most people can recall their adolescent years. As toddlers they were distracted, restless or silly. As teenagers they were defiant, i gnorant, impatient or stubborn. Therefore they could not be still to listen or observe what their parent wished to pass on to them. When they grew up to be more mature, especially for those who become parents, they really know and appreciate the values of being still to listen and observe what their father or mother tried to teach them.

I am blessed and honored that You let me see things from Your view. From the human eyes I see the chaos, injustices, or transgressions; but from Your view You see a big puzzle with all the tiny pieces that fit perfectly. You know how to allow an act to happen that benefits all souls

including the immature and experienced ones. Only You can decide to let an act or situation take place that can be a good less on for an immature soul and become an invaluable opportunity for an experienced soul. In the human world people cannot see this depth and for sure they do not have Your knowledge to make these impactful decisions. You showed me a vision of a toddler and teenager. The toddler really wanted to get his brother's favorite to y car. While his brother was not home he asked his father to get the toy ear in his brother's room. With the father's permission he took the toy to play. But he was not careful and broke it. Later, his brother found out and was very angry at the younger brother for breaking his favorite toy. But he was more upset because his father allowed the younger brother to take his toy! The father knew at this time the toddler needed to learn a good lesson as he actually felt bad because he broke the toy that he and his brother really liked. It was also an opportunity for the teenager to realize the brothedy relationship is worth more than a toy. Through this example, You revealed to me the different levels of understanding. The toddler's only interest was the toy and he would not understand anything else the father tried to tell him. The teenager had his own way and believed he knew everything so he might not listen to the father's advice or guidance. The father knew his children's levels and he felt responsible for their growth and well-being. Certainly, the father had the ability to guide and help his children. In this example the father could easily resolve the problems by buying the favorite toys for both children. From this perspective, I recognize that You are our Divine Parent who has the abundant grace and love. One ting speck of Your grace or love would be more than enough to calm a turbulent storm or violent aggression. I can compare the hidden potential of your grace and love to the nuclear energy inside an atom. I use the concept of the GPE's Radiation Effect to describe the deep impact of God's grace and love.

HUMILITY & PATIENCE

As humans we have learned from You that Humility and Patience are the most effective and powerful nutrients for the GP seed to have high yield. Humility gives us total access of the knowledge base because we really appreciate and value people's opinions or viewpoints. Since we humbly and vespectfully listen or pay attention to others, we actually download everything. It is the ego or power struggle that causes us to be critical or discriminating and to limit ourselves. Patience lets us utilize the full range of time and observe its powerful effects. When we patiently wait for things to unfold, we actually weather the storms or experience the changing seasons to find the meaning of the events. Through this process we develop compassion, wis dom and courage. Therefore all of the surrounding environments, adverse/favorable conditions, or external/internal circumstances are the necessary fertilizers for this GP seed.

Mankind meds to understand the essence of time because the Creator has made it with a specific purpose. The day, night, or seasons have special roles or functions in the grand design. Human beings are very arrogant, distracted, ignorant or impatient. They want everything now and in their mind the day is too short and the night seems to be too long or vice versa. People rush through life and do not appreciate the precious moments that God has given through the good and bad times, or the high and low points. On my journey, even though there were many dark storms and turbulent times You have taught me to be still so I can observe the movement of life, the synchronicity of nature, and the Creator's precision. You would sit and be still with me through the night in order to wait for the first light of dawn. You have taught me the profound values of Humility and Patience by being still and observe how the dark night is transforming into dawn. Being a loving parent, You sat through the night with me and experienced my disappointments, fears, mistakes, temptations or unrest. Through the lesson of being still You have shown me the subtle Voice of Silence and its effective resonance.

I know I am sitting on top of an infinite treasure, but I need to work diligently to benefit from the hard-earned values of Humility and Patience. I do not think that I am the only one who can see this. I believe You also reach out to many others and help them just as You have done to me. I certainly wish to see more people who can discover the significant benefits and potentials of the GP seed that You planted deep within each individual's heart/mind. There are many people who do not believe nor know God because they simply do not have enough information. At this point in time, people desperately need to know God. How do they get to know God? People simply need to be still in order to see God's Presence every where around them. As humans, we act like children who are restless or impatient and cannot sit still or be silent for a moment to get what the parent is trying to show or say.

You can open many doors of opportunity but You allow me to experience the internal opening of the intuitive potential, rather than the opening from the outside. The internal opening requires the open heart/mind, truthfulness and humility in which a person gradually experiences and discovers the God's Presence inside as well as outside the body. The opening from the outside is the ease of somebody who helps to open a person's mind eye. In this process a person can become dependent on the one who opens his/her mind eye and is easily in fluenced by his/her mentor or master.

The first wave of GPE practitioners are blessed to experience how the seeds are planted and they gradually go through the growth process. These GP seeds are different from the other seeds. The growth of the other seeds will depend on the environment and soil where they are planted. If the environment is not suitable or the soil is bad then these seeds may not be able to grow and reach their full potentials. However, the GP seed can change the environment or transmute the soil where it is planted in order to grow according to its potential. For example, a GP seed can be

in a broken home, bad community, or strict culture and it converts all of these factors into fertilizers to promote growth. The seeds of the future generations of GPE practitioners will have much better growth because the soil has been fertilized by many experiences or results from the first or recent waves.

I praise You for the profound lessons of Humility and Patience because there are many people who are struggling during this challenging and turbulent time in which every body is covered by the dark cloud of danger, fear, isolation or suffering. My Lord, I make a solemn pledge to You that I shall complete the tasks you have given me. My soul shall not rest nor return home until I finish the assignments that were entrusted to me. I have vowed to stay in the Dark Abyss and help the souls who are trapped. Through grace and guidance You have given unconditional love to my defiant, sinful and weak soul. Now, I am a seed that will be planted in the lowest depth of the Dark Abyss to be a witness of Your grace and love for all the tormented souls. I am forever committed to be Your instrument. You see through the depth of my heart and soul. You are my Maker, my Judge and my Savior. There is nothing in the physical world and in the spiritual realm that can stop my commitment and my trust in You. Amen.

Vu Tran
